The FCD final continuation Editing Meeting completed its business on the 27th of January 2000 with the following resolution which was passed unanimously by all 7 National Bodies present.:

The FCD final Editing Meeting held in Santa Fe, New Mexico, U.S.A. between the 17th and the 27th January 2000 recommend that the SQL/Object Language Bindings (SQL/OLB) document be progressed to FDIS as soon as the revised text is available.

The National Bodies voting included 4 of the 5 National Bodies that voted No on the ballot. 119 comments resulted from the ballot, of which 60 were categorised as Major Technical, 17 were categorised as Minor Technical, 32 were categorised as Major Editorial, and 10 were categorised as Minor Editorial.

The Editing Meetings managed to resolve all of these 119 Ballot Comments. A number of Ballot Comments required that any additional problems discovered during the editing process also be resolved. All such problems discovered were resolved by proposals addressing existing ballot comments.

At the close of the final meeting there were **no** outstanding known problems with the part under ballot.

We hope therefore that the SC32 secretariat will be able to initiate a Final DIS Ballot for these parts immediately the final text is available.

The Editor, Jim Melton, plans to ship camera ready copy on Sunday, April 30th, 2000 to the SC32 Secretariat for the two-month FDIS ballots on this SQL part.

The SQL FCD editing meeting further recommended, following past precedent, that the following documents should comprise its Disposition of Comments Report:
