**OECD Liaison Report to ISO/IEC JTC 1/SC 32
April 5, 2005**

By Dan Gillman

OECD

The OECD is currently developing a corporate facility for the storage and dissemination of metadata called MetaStore, which will be used in conjunction with a corporate dissemination database (OECD.stat). An important element of the MetaStore facility are the content standards the OECD is working on with other sponsoring SDMX partner organisations, in particular, the use of a common list of metadata items using terminology and definitions being developed in the Metadata Common Vocabulary (MCV).
