

Committee Draft ISO/IEC CD	
Date: 2005-12-28	Reference number: ISO/JTC 1/SC 32N1398
Supersedes document SC 32N1185	

THIS DOCUMENT IS STILL UNDER STUDY AND SUBJECT TO CHANGE. IT SHOULD NOT BE USED FOR REFERENCE PURPOSES.

ISO/IEC JTC 1/SC 32 Data Management and Interchange Secretariat: USA (ANSI)	Circulated to P- and O-members, and to technical committees and organizations in liaison for voting (P-members only) by: 2006-03-27 Please return all votes and comments in electronic form directly to the SC 32 Secretariat by the due date indicated.

ISO/IEC CD 20944-82:200x(E) Title: Information technology - Metadata Registry Interoperability & Bindings (MDR-IB) Part 82: Profile for 11179-3 MDR metamodel Project: 1.32.17.01.82.00
--

Introductory note: The attached document is hereby submitted for a three-month letter ballot to the National Bodies of ISO/IEC JTC 1/SC 32. The ballot starts 2005-12-28. Medium: E No. of pages: 9

Address Reply to: SC 32 Secretary, ISO/IEC JTC 1/SC 32, Farance Inc, Island Box 256, New York, NY 10044-0205, United States of America

Telephone: +1 212 486-4700; E-mail: SC32-Sec@JTC1SC32.org

Reference number of working document: ISO/IEC JTC1 **SC32 N1398**

Date: 2005-12-25

Reference number of document: **ISO/IEC CD2 20944-82**
[Release Sequence #8]

Committee identification: ISO/IEC JTC1 SC32 WG2

SC32 Secretariat: US

**Information technology —
Metadata Registries Interoperability and Bindings (MDRIB) —
Part 82: Attribute mapping for 11179-3 metadata registry metamodel**

Warning

This document is not an ISO International Standard. It is distributed for review and comment. It is subject to change without notice and may not be referred to as an International Standard.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Document type: International standard
Document subtype: if applicable
Document stage: (30) Committee
Document language: E

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 20944-82 was prepared by Technical Committee ISO/IEC JTC1, *Information Technology*, Subcommittee SC32, *Data Management and Interchange*.

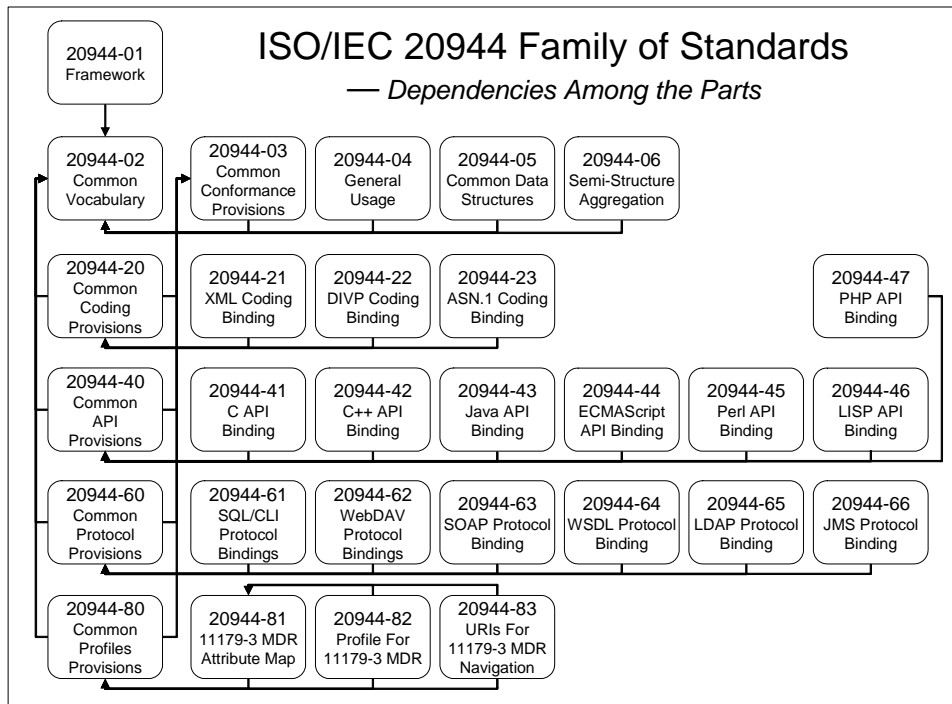

ISO/IEC 20944 consists of the following parts, under the general title *Information technology — Metadata Registries Interoperability and Bindings (MDRIB)*:

- *Part 01: Framework*
- *Part 02: Common vocabulary*
- *Part 03: Common provisions for conformance*
- *Part 04: Generic usage*
- *Part 05: Common data structures and services*
- *Part 06: Semi-structured aggregation*
- *Part 20: Common provisions for coding bindings*
- *Part 21: XML coding binding*
- *Part 22: DNVP coding binding*
- *Part 23: ASN.1 coding binding*
- *Part 40: Common provisions for application programming interface (API) bindings*
- *Part 41: C API binding*

- *Part 42: C++ API binding*
- *Part 43: Java API binding*
- *Part 44: ECMAScript API binding*
- *Part 45: Perl binding*
- *Part 46: LISP binding*
- *Part 47: PHP binding*
- *Part 60: Common provisions for protocol bindings*
- *Part 61: SQL/CLI protocol binding*
- *Part 62: WebDAV protocol binding*
- *Part 63: SOAP protocol binding*
- *Part 64: WSDL protocol binding*
- *Part 65: LDAP protocol binding*
- *Part 66: JMS protocol binding*
- *Part 80: Common provisions for profiles*
- *Part 81: Attribute mapping for 11179-3 metadata registry metamodel*
- *Part 82: Profile for 11179-3 metadata registry metamodel*
- *Part 83: Uniform Resource Identifier (URI) suffixes for 11179-3 metadata registry metamodel navigation*

Introduction

The following diagram shows the organization of the ISO/IEC 20944 family of standards.

Organization of ISO/IEC 20944 family of standards.

This Part provides the common provisions for conformance that are referenced in other parts of this International Standard.

Information technology — Metadata Registries Interoperability and Bindings (MDRIB) — Part 82: Profile for 11179-3 metadata registry metamodel

Editor's Note: Each part of 20944 is marked with a common sequence number ("[Release Sequence #N]") to indicate they are synchronized and harmonized among themselves. The mark "[Release Sequence #N]" does *not* imply that there are a complete set of N-1 prior drafts for any particular Part.

1 Scope

The ISO/IEC 20944 family of standards describe codings, APIs, and protocols for interacting with an ISO/IEC 11179 metadata registry (MDR).

This part specifies mapping of metamodel attributes, as specified in ISO/IEC 11179-3, to identifiers for the purpose of navigating metadata registries.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC 11179-3:2003, *Information technology — Metadata Registries (MDR) — Registry metamodel and basic attributes*

ISO/IEC 20944-01:—¹, *Information technology — Metadata Registries Interoperability and Bindings (MDRIB) — Overview*²

ISO/IEC 20944-02:—³, *Information technology — Metadata Registries Interoperability and Bindings (MDRIB) — Common vocabulary*

ISO/IEC 20944-80:—⁴, *Information technology — Metadata Registries Interoperability and Bindings (MDRIB) — Common provisions for profiles*

¹ To be published.

² The current drafts of the 20944 series are available at "<http://metadata-standards.org/20944>".

³ To be published.

⁴ To be published.

ISO/IEC 20944-81:—⁵, *Information technology — Metadata Registries Interoperability and Bindings (MDRIB) — Attribute mapping for 11179-3 metadata registry metamodel*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in Part 02 and the following apply⁶.

3.1

referenced data interchange specification

data model that is being used for a defined interoperability binding

NOTE The term *referenced data interchange specification*, defined in 20944-02, is used throughout the 20944 family of standards to reference the data model that is being used for the bindings. The *referenced data interchange specification* is tied to the bindings via normative reference, e.g., some other standard defines a data model and uses 20944, via normative reference, to provide some coding, API, or protocol bindings. For Part 82, the *referenced data interchange specification* refers to the 11179-3 metamodel. Part 04 of this International Standard, explains how other standards and specifications may use or re-use portions of the 20944 family of standards.

3.2

navigable identifier

identifier that may be used for navigation and access

4 Profile

This Part identifies ISO/IEC 11179-3 as the referenced data interchange specification. This Part incorporates, normative reference, the following standards:

- ISO/IEC 11179-3
- ISO/IEC 20944-02
- ISO/IEC 20944-80
- ISO/IEC 20944-81

NOTE 1 The purpose of normative referencing these standards is to incorporate the provisions that describe the 11179 metamodel (i.e., 11179-3), the terminology (i.e., 20944-02), the common provisions for profiles (i.e., 20944-80), and the navigable identifiers associated with the metadata item attributes (i.e., 20944-81).

NOTE 2 The result of this profile is (1) a set of navigable identifiers that correspond to the 11179-3 metamodel, and (2) the implicit data model is the 11179-3 metamodel. The intent is to combine this Part with coding, API, and protocol bindings. For example, requiring 20944-82 (this Part) and 20944-21 (XML coding binding) gives a specification that describes an XML rendering of the 11179-3 metamodel; requiring 20944-82 and 20944-41 (C API binding) gives a specification that describes a set of C programming language services that access an 11179-3 metamodel (i.e., C APIs for access to a metadata registry).

⁵ To be published.

⁶ Users and implementers of this International Standard may find it useful to reference additional terms and definitions from 20944-02.
