COMMENTS:

Canada

Yes. See comments below:

Canadian Comments on SC32 1835B Letter Ballot

1. We find the name 'Semantic Metadata Mapping' unclear. What is 'semantic metadata'? We suggest changing the title to e.g. 'Metadata Concept Mapping Procedure'.
2. This should be a type 3 Technical Report.
3. The WD provided as WG2 N1217 needs to be converted to the Technical Report format.
4. Examples in WD are of a library & information standards nature. From a "linguistic equivalency" perspective ISO 5964 - Guidelines for the establishment and development of multilingual thesauri would be relevant to this project.
5. The approach to "metadata element set" seems to involve that of a "controlled vocabulary". Here SC32/WG1 -eBusiness standard development of (FDIS) ISO/IEC 15944-7 Business operational View- Part 7:e-Business Vocabulary" may assist in the development of this project (especially its Clause 5.2 "Principles and rules for the development of a definition for a concept and assignment of an appropriate term in a "controlled vocabulary" [See document JTC1/SC32 N1826.
6. Standards development work in this area, which may be useful for this project, is already underway in JTC1/SC36e-Learning via its WG7 Culture, Language and Individual needs via the development of ISO/IEC Information technology - Individualized adaptability and accessibility in e-learning, education and training - Part 8: Language Accessibility and Human Interface Equivalencies (HIEs) in e-Learning Applications: Principles, Rules and Metadata Elements". Here Canada is willing to provide the necessary liaison with SC36/WG7."
