**Title:**

**Call for Participation to Study Period workshop on  
ROR/ODMS/PSO & SQLMM MDR**

**Date: 2009.06.20**

**Source: He Keqing, Hajime Horiuchi, Doo-Kwon Baik**

**Rationale:**

The SC32 have approved a couple of study projects on the topics, such as the ROR (Registry Of Registries), ODMS (On-Demand Model Selection) that are expected to be candidate standards in the scope of the MFI (ISO/IEC19763).

However, regarding the MFI, it should be required to review and redefine the overall structure of the MFI family in order to accommodate new requirements and the self evolutions at each part.

The SC32 also, approved new sub projects, such as the PSO (Procedure of the Specification for the Semantic Web) and the SQL MM for MDR, those are very close to the scope of the MFI.

Then, a workshop on these topics should be needed to calibrate scopes and investigate technical issues through the F2F discussions.

It will be held at the Wuhan University, Wuhan, China as followed.

Date: Aug. 21<sup>st</sup> (Fri), 2009 – Aug. 22<sup>nd</sup> (Sat), 2009

Place: SKLSE (State Key Laboratory for Software Engineering) of Wuhan University, Wuhan, China.

Host : He Keqing (Wuhan University, China)

Co-organizer;

Hajime Horiuchi (Tokyo International University, Japan)

Doo-Kwon Baik (Korea University, Korea)
