Project: 1.32.03.04
Title: Convenor's recommendation on COR 9075:2004 progression to the SC32 secretariat
Author: Stephen Cannan (The Netherlands)
Source: ISO/IEC 9075 Ballot Resolution Meeting for ISO/IEC DCOR 9075, Database Language SQL
Status: Output document from Ballot Resolution Meeting

The ISO/IEC Ballot Resolution Meeting completed its business on the 19th of November 2004 with the following resolution, which was passed unanimously by the 7 National Bodies present:

The Ballot Resolution Meeting held in St. Croix, USVI. between the 15th November and the 19th of November 2004 recommend that the output texts of this meeting be submitted the SC32 secretariat, as soon as the revised texts are available.

The National Bodies voting included all 3 National Bodies that voted No on the ballot.

314 comments resulted from the ballot. 120 of these comments addressed unresolved defects in the published standard rather than in the DCOR text. A number of Ballot Comments required that any additional problems discovered during the editing process also be resolved. 36 such problems were discovered.

The Editing Meetings managed to resolve all of the Ballot Comments which addressed the DCOR text and many of the additional problems. However, 76 of the comments were resolved by adding them to the list of Possible Problems (Defect Reports) if they were not already in the list.

We hope therefore that the SC32 secretariat will submit the texts for immediately publication as COR documents.

The SQL ballot resolution meeting further recommended, following past precedent, that the following documents should comprise its Disposition of Comments Report:

- 1) 32N1196, Convenor's recommendation on progression to the SC32 secretariat (this document)
- 2) 32N1194, ISO 9075 Final Disposition of Comments
- 3) 32N1195, Minutes of ISO 9075 Ballot Resolution Meeting, Christiansted, St. Croix, USVI..
- 4) 32N0889, Minutes of ISO 9075 Ballot Resolution Meeting, Dresden, Germany.

Stephen Cannan
Convenor ISO/IEC JTC 1/SC 32/WG 3
